Full AnalysisDetailPage — Design Mockup

Scroll down to see all sections. This is the complete proposed layout for the page and track content.

① Page-level layout (AnalysisDetailPage.tsx)

AnalysisDetailPage

← Back Supply Chain Analysis · 2026-03-29 optimization · completed · 4m 12s ↓ Export PDF

Share link: https://datalyze.app/r/supply-chain-2026-… Copy

Agent activity · insight_generation · "Synthesizing 14 insights from 3 sources" ▸

Pipeline log · FINALIZE · 21/21 stages · duration 4m 12s ▸

Charts & Insights | Knowledge Graph

Inside "Charts & Insights" tab → TrackRenderer → (e.g.) OptimizationTemplate

$2.4M	18%	3.2x	↓14%
Annual savings	Throughput gain	ROI	Lead time

Recommendations — 3 actions

Reduce WIP limits on Stage 3 · Automate supplier PO · Consolidate SKUs

Confidence — 82%

Data quality: 88% · Depth: 79% · Actionability: 80%

Orchestration · 6 agents · data: 2 uploads + public sources ▸ expand

Constraint Impact Analysis ▸ expand

Top bottleneck: Stage 3 queue — ~14h recoverable weekly

Tornado Chart — Sensitivity ▸ expand

Lead time variance dominates: ±23% impact on profit

Gantt — Implementation Roadmap ▸ expand

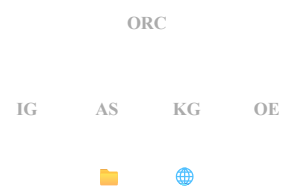
3 phases · 12 weeks · Q1 2026 start

Strategic Priorities expanded ▾

Supply chain resilience · Inventory optimization · Supplier diversification

③ Orchestration Visualization (expanded state — Three.js / R3F)

Orchestration · 6 agents · data: 2 uploads + public sources ▾ collapse



Three.js · click nodes for detail

← Click any node to see agent name, status, last message, source type

② CollapsibleAnalysisSection — component API

```
CollapsibleAnalysisSection props

title
string — section heading
summary
string | ReactNode — collapsed preview (one line)
defaultOpen
boolean (default false) — initial state
storageKey
string — sessionStorage key for persist-on-refresh
children
ReactNode — full chart / section content
priority
number? — from chart_priority score, used for sort order
```
